

CREATE SERVICE INSTANCE

The screenshot displays the IBM Cloud website's 'AI / Machine learning' section. The browser's address bar shows the URL: `cloud.ibm.com/docs/account?topic=account-searching-for-resources&interface=ui`. The navigation bar includes the IBM logo, 'Cloud', 'Products' (selected), 'Solutions', 'Pricing', 'Docs', 'Support', and 'Explore more'. A search bar, 'Log in', and a 'Create IBM Cloud account' button are also present. The left sidebar lists various categories: Analytics, Automation, Blockchain, Compute, Containers, Databases, Developer tools, IBM Cloud Paks, Integration, Internet of things, Logging and monitoring, Mobile, Networking, Quantum, Security, and Storage. The main content area is titled 'AI / Machine learning' with a sub-header 'Leverage IBM Watson® for natural-language processing, visual recognition and machine learning'. It features a grid of nine service cards: IBM Watson Assistant, IBM Watson Discovery, IBM Watson Knowledge Catalog, IBM Watson Knowledge Studio, IBM Watson Language Translator, IBM Watson Machine Learning, IBM Watson Natural Language Classifier, IBM Watson Natural Language Understanding, IBM Watson OpenScale, IBM Watson Speech to Text, IBM Watson Studio, and IBM Watson Text to Speech. Each card provides a brief description of the service. A 'Feedback' button is located on the right side of the main content area. At the bottom, there is a 'Search support cases' section with a description and a 'Cookie Preferences' button. The Windows taskbar at the very bottom shows the time as 10:39 AM on 18-11-2022.

Leverage IBM Watson® for natural-language processing, visual recognition and machine learning

- IBM Watson Assistant**
Virtual agents customizable to any domain
- IBM Watson Discovery**
Search and analytics engine that adapts to custom domains
- IBM Watson Knowledge Catalog**
SaaS for AI data management
- IBM Watson Knowledge Studio**
Visual interface to teach Watson domain-specific knowledge
- IBM Watson Language Translator**
API for translation with domain-specific models
- IBM Watson Machine Learning**
Infrastructure for running AI models at scale
- IBM Watson Natural Language Classifier**
Visual tool and API for text classification
- IBM Watson Natural Language Understanding**
API for text analysis and metadata extraction
- IBM Watson OpenScale**
Dashboard to monitor model fairness, explainability, drift
- IBM Watson Speech to Text**
API for real-time speech recognition and transcription
- IBM Watson Studio**
IDE to build, run and manage AI models
- IBM Watson Text to Speech**
API for real-time text to speech conversion
